

A product mix that is purposeful, tested, reliable and possess unique attributes that ADD VALUE in design, construction and maintenance over the course of the entire life-cycle of a project.

Designed and manufactured in Alpharetta, Georgia our client has been on the front edge of Branded Image and Architectural components including: Entry Portals, Custom Canopies & Structures, Awnings, Louvers, Sun Shades, and Interior & Exterior Metal Cladding.

Architectural products utilizing Glass fiber Reinforced technology providing lightweight, extremely durable non-combustible and non-toxic products, which exhibit extreme amounts of strength.

Window Films & Coatings with more than 20 years of experience designed to reduce solar heat gain, glare and fading, share remarkable levels of clarity and cleanliness. Cast a warm ambiance; reduce heating/cooling costs, glare and UV rays on the inside.

Innovative surfaces that facilitate principles of photo catalytics. The catalyst baked into the glaze (titanium dioxide) triggers a reaction between light, oxygen and humidity, whereby active oxygen is formed which decomposes micro-organisms such as bacteria, fungi, germs, algae and moss. Easy to clean, anti-microbial and air cleansing makes hydroprotect tile ideal for Food Preparation & Processing, Medical, Swimming Pools and Wellness, Exterior and Interior Facades, Entrance and High Traffic, Common Areas, Restroom and other Sanitary environments.

Products may be used towards accumulation of points and accreditation of LEED certification and are supported by American Institute of Architects CE courses.
